

BATTERY CLEANER

Description

The BATTERY CLEANER is a moderately alkaline, but extremely effective solution which will safely neutralize mineral acids (e.g. sulphuric acid) on batteries, clothing and skin. It is designed primarily to help protect battery terminals, clamps and connectors by removing corrosion from these areas and can also locate and identify acid leaks.

Use/Benefits

- Cleans and protects battery terminals, clamps and connectors
- IMPROVES overall lifetime of battery
- Ensures better battery performance
- Easy to use format: Spray generously then wipe off
- Excellent acid leak detector and neutralizer
- Non-flammable

Physical Properties

Colour	-	Amber
Odour	-	Neutral
pH	-	Alkaline
Flammable	-	Non-flammable

Package

Can size: 8 oz
170 grams (6 oz)

Product

11111-BT1700
