

MOLY GREASE

Description

A premium quality solid lubricant fortified with molybdenum disulphide (MOLY). It is typically used as an anti-seize or general all-purpose lubricant. The product has HIGH anti-friction and anti-seizure properties.

Use/Benefits

- MOLY is a heavy duty lubricant used for general plant maintenance, metal working trade, machinery manufacturers and manufacturers of mechanical equipment and engines
- Ideal for use on gears, dies, conveyors, cams or anywhere a solid lubricant is required.
- Excellent characteristics for extending life expectancy of machinery parts
- Fast drying film resists dirt and dust build-up
- Non-conductive
- Bonds instantly to metal, rubber, plastic and most substrates

Physical Properties

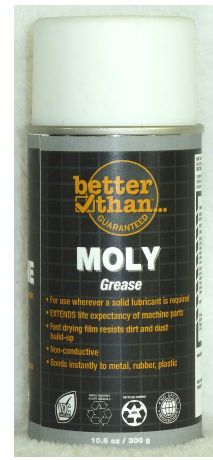

Colour	-	Black
Odour	-	Mild solvent
pH	-	Not Applicable
Flammable	-	Yes

Package

Can size: 12 oz
300 grams (10.6 oz)

Product

11111-BT111
