

## BRIGHT ZINC GALVANIZING SPRAY

### Description

BRIGHT ZINC GALVANIZING SPRAY is a fast drying epoxy coating containing fine leafing zinc flakes. The product forms a permanent coating that protects the steel from rust and corrosion. Surface must be dry and free of contaminants.

### Use/Benefits

- High Performance product fuses Zinc to the metal substrate and protects against corrosion
- Bright Metallic finish for touch up & repair of hot galvanized parts
- Fast drying: Dries to touch in 15 minutes
- Provides long lasting protection for steel and other ferrous metals from rust and corrosion
- Self-healing: protects even when surface is dented or scratched
- Meets ASTM A 780-1 specifications
- CFIA and USDA approved for use in food plants

### Physical Properties

Colour	-	Shiny aluminum
Odour	-	Aromatic
pH	-	Not applicable
Flammable	-	Yes

### Package

Can size: 16 oz  
369 grams (13 oz)

### Product

11111-BT363
