CRAWLING INSECT KILLER

Recommendations

SPOT TREATMENTS:

- To kill Ants, Cockroaches, Crickets, Silverfish, Spiders, Sowbugs, Earwigs and Carpet Beetles:** Spray areas where these pests are found or may hide, including dark corners of rooms and closets; cracks and crevices in walls; along baseboards and door and window frames; behind and beneath sinks, stoves, refrigerators and cabinets and around garbage cans, plumbing and other utility installations. **For ants**, apply to ant trails, also around doors and windows and wherever else these pests may find entrance.
- To kill Brown Dog Ticks and Fleas:** Thoroughly apply as a spot treatment to infested areas such as pet beds and resting quarters, nearby cracks and crevices, along and behind baseboards, window and door frames and localized areas of floor and floor coverings where these pests may be present. Old bedding should be removed and replaced with clean, fresh bedding after treatment. Do not spray pets with this product.
- To Kill Flies and Mosquitoes:** Use only outdoors as a barrier spray and aid in reducing annoyance from these insects. Spray outside surfaces of window and doorframes as well as other areas where these pests may enter the home. Also spray dark corners and localized resting areas, such as under eaves or porches, patios and garages, where these insects may congregate. Insects coming to rest on treated surfaces will be killed.

CRACK & CREVICE:

- To kill Ants, Cockroaches, Crickets, Silverfish, Sowbugs, Spiders, Earwigs, Brown Dog Ticks, Fleas and Carpet Beetles:** Apply as a coarse spray directly into cracks & crevices. Spray surfaces until wet. Repeat as needed.
